

Here is the **FREE REPORT!**

“How An Accidental Discovery By NASA In Outer Space *Quickly And Easily* Solves 86% of Back Pain And The *Breakthrough* Medical Technology That’s Bringing It To YOU!”

Dear Back Pain Sufferer,

There is a very good reason why thousands of *former* back pain sufferers are calling non-surgical spinal decompression the “eighth wonder of the world.”

This amazing new medical breakthrough, *accidentally* discovered through space travel, is responsible for cracking the back pain code for thousands of FORMER pain sufferers. Many previously tried *everything* and were thought to be hopeless cases. So many that were told – “*We’ve done all we can do for you, you’re just gonna have to live with the pain,*” are now pain free.

Know this: This report is more than just how OTHER people solved their back pain. *Much more.* It reveals exactly how YOU can too.

Imagine living the rest of your life pain free.

Imagine waking up tomorrow morning with your back pain GONE.

Imagine how much easier your life would be if you could just be pain free.... *once and for all.*

There really is an easy way. In this report, I will reveal to you that way and give you a \$245 gift so you can see it all *absolutely risk-free.*

I’m actually willing to personally guarantee if you are seriously motivated to finally put an end to your agonizing back pain – naturally – without drugs or surgery, this will be the most exciting and important report you ever read. Why?

Many modern doctors are saying this amazing new technology has *revolutionized* back pain treatments and may make spinal surgery (and other back pain treatments) way less popular!

Countless failed back surgery patients have *finally* found relief after surgery made them worse. With this new technology, it’s obvious *they* may have never needed surgery in the first place.

The fact is: Back surgery has had very disappointing results. It is also very risky. One side effect is your pain gets WORSE. Another PARALYSIS. A third – DEATH.

Why would you even consider surgery when...

Clinical studies have shown *non-surgical* spinal decompression to be successful (good or excellent relief) in 86% of patients with herniated discs and degenerative joint disease – without the side effects. (1)

The most amazing thing is:

One study also showed a 90% reduction in disc herniations in 71.4% of patients. (2)

Why is that so amazing? Herniated discs were thought to be just about untreatable without surgery before the introduction of this incredible new technology.

Even better, treatment with this space-age non-surgical technology is *pain-less, drugless and there are no documented side effects*. In fact, many patients report the treatments are so relaxing... they actually fall asleep.

And best of all...Results are much better.

**How Would You Like To Check Out This
Amazing New Technology And
See If You Qualify For Treatment... Absolutely Free?**

You will get to see everything first hand and find out if spinal decompression will be *your* back pain solution like it has been for 86% of *former* back pain patients in well documented studies.

In a minute I'm going to reveal to you exactly how you can do just that... *and a whole lot more*. But first, I want to tell you the amazing true story how spinal decompression was discovered, how it works...and... why there is an 86% chance it will be the answer to YOUR back pain.

Even if you decide not to take me up on my incredible free offer, just reading this story will give you many of the back pain answers you have been looking for.

Here's the story:

“How Space Travel Cures Back Pain”

The United States space exploration program has had many intentions. Be the first to land on the moon. Orbit the Earth. Even look for other life forms... you know... aliens.

As far as I know, solving back pain was not one of them.

But that's exactly what was discovered just over 10 years ago... *completely by accident*.

Here's how: Over the years, NASA began to notice an unexpected result of space travel – Astronauts that left with back pain would come back without it. So NASA did what they are good at... they investigated this new phenomenon.

Here's what they found: During the anti-gravity state of the mission there were decompressive forces on the intervertebral discs and back pain was relieved. They also found Astronauts height to be increased.

How?

Imagine your spine as bunch of blocks stacked on top of each other. 24 blocks to be exact. In between each block is a disc. Discs are sort of like a jelly donut.

The outside of the disc is made up of tough fibers called the annulus fibrosis and the inside has a soft, jelly like substance... the nucleus pulposus.

When your disc is injured or torn, the jelly like substance on the inside can leak out. This is called a herniated disc.

If the outer material is not torn, discs can bulge – without herniating. Kinda like if you step on a balloon and it doesn't pop. The balloon bulges out to one side or the other without the rubber breaking.

When a disc bulges or herniates it is a major cause of back pain. It can also pinch the delicate nerves that pass by as they come out of the spine.

That's What Can Causes Radiating Pain... Or... Pain, Tingling And Numbness Going Down Your Leg And Possibly Into Your Toes.

This is often referred to as sciatica.

Now back to the Astronauts...

When you travel through space, the effects of gravity are removed and you are in a weightless state. All the pressure is taken off your spine and discs.

Even better – and this is the key -- it seems as though a negative pressure is created.

It is believed, this negative pressure *actually sucks the herniated material back into the disc and allows it to heal* (I'll show you some proof of that in just a little bit).

By naturally drawing the herniated material back into the disc, pinching of the nerves is relieved and so is the pain. It takes away the true cause of your pain and symptoms instead of masking it with drugs or cutting the herniation out with surgery.

With the herniated material back where it was supposed to be, Astronauts also gained height. One of the major reasons you loose height as you get older is this shrinking of multiple discs.

One Big Problem...

All this sounds great. But there was only *one big problem* with this miracle back pain solution: *you needed to spend time in outer space to get these great results!!!*

If you weren't an Astronaut – you were out of luck! That's until now...

Recent medical breakthroughs have led to the development of advanced technologies to reproduce the effects of anti-gravity space travel RIGHT HERE ON EARTH!

Through the combination of proven scientific principles, the latest technological developments and the brilliant work of a specialized team of physicians and medical engineers – **Rolling Hills Chiropractic & Rehabilitation** now offers this space age technology. The process will relieve pain by:

- **Enlarging The Disc Space.**
- **Reducing Herniations.**
- **Strengthening Outer Ligaments To Help Move Herniated Material Back Into Place.**
- **Reversing The High Intra-Disc Pressures Through The Application Of Negative Pressure.**

In simple English...

Spinal Disc Decompression Relieves Pain Fast!

According to a study in the *American Journal of Pain Management*,⁽³⁾ the decompression method provided good to excellent results for 86% of patients with herniated or ruptured discs and 75% of patients with facet arthrosis reports a manufacturer of decompression equipment..

Let's Summarize:

In a nutshell, NASA accidentally discovered that the anti-gravity effects of space travel on Astronauts cured their back pain. Modern medical technology has closely duplicated these effects right here on earth with the ABS non-surgical decompression equipment. And here's the best part...

The main conditions **Disc Decompression** has success with are:

- Back pain
- Sciatica
- Herniated and/or bulging discs (single or multiple)

- Degenerative disc disease
- A relapse or failure following surgery
- Facet syndromes

A very important note: Disc Decompression has been successful with even the most severe cases... even when NOTHING else has worked. *Even after failed surgery.*

What Are Treatments With Disc Decompression Like?

After being fitted with a support system, the table slowly elevates you to the horizontal position. You are lying face down. The support system helps to stabilize your upper/lower body. The doctor adjusts the table to the proper angle of distraction, allowing us to target specific discs... that are causing your pain and symptoms.

The distractive forces utilize a logarithmic curve to avoid proprioceptor response, which would create muscle spasm. The split table design decrease friction and allows separation of the vertebra, *minimizing the effect of gravity.*

Basically, you lay face down and the amazing **Disc Decompression table** gives an anti-gravity effect on your back that helps herniated material return to it's normal position and stop the pain.

Patients describe the treatment as a gentle, painless, intermittent pulling of your back. And like I said before, it can be so relaxing, many patients actually fall asleep during treatment.

How Is Disc Decompression Different From Other Traction Devices?

Regular traction has been around for a long time. Its results with back pain have been *minimal at best.* The big problem with traction is it pulls both the muscles and the spine. **Disc Decompression** applies specific forces to decrease intradiscal pressure and enhance fluid exchange *within* the disc. This expands the space between the bones and restores nutrients and blood flow to the disc – which causes healing.

MRI studies comparing regular “old” traction to spinal decompression have shown regular traction dos NOT return herniated material back into the disc, **while spinal decompression does.** (4)

Patients also say that **Disc Decompression** is extremely comfortable... even relaxing... while traction can be very uncomfortable.

How Long Are Treatments And How Many Do You Need?

Patients typically undergo 15 to 20 treatments sessions. Each treatment last between 30 – 45 minutes. This, of course, depends on your individual case and is determined by a thorough evaluation.

Following each session, a cold pack and electric muscle stimulation are applied to help pain relief and speed the healing process.

It is important to note that many patients get substantial, immediate relief after just a few treatments. Some after just one.

The really good news in... this is not something you have to continue to do for the rest of your life. So it is not a big commitment.

**Right About Now There Are Only
Two Questions You Should Be Asking Yourself:**

Question #1: How do I find out if I am a candidate for the **Disc Decompression**?

Question #2: How much is it going to cost me?

Here's the answer to #1: If you could be here with me right now, I could show you, through computerized testing and examination procedures, **EXACTLY** what's causing you problem and if you are a candidate for **Disc Decompression**. I can also tell you if you have a condition that requires treatments.

I could show you and explain to you in plain and simple English (no medical mumbo-jumbo most doctors give you) what's going on and how you can get better as fast as possible. How you can finally start getting your life back.

Here's a sampling of what you would discover if you were here with me right now:

1. **A consultation with the doctor to discuss your problem and answer ALL your questions you may have about back pain and Disc Decompression. You will be taken by the hand and ALL your questions and concerns will be answered before you leave.**
2. A complete back pain/spinal decompression qualification case history and questionnaire to help determine if you are a candidate for **Disc Decompression**.
3. A surface EMG to help pin-point what's causing your problem. This is computerized, "space-aged" technology being used by NASA. It will help determine if you will be helped by my program. This is NOT the needle EMG and is painless!!! I have given you a sample printout of this powerful technology with this report.
4. **A written "Recommended Action Plan" giving you the results of your examination, tests, if you qualify for our Disc Decompression program and what your options are. If at this point our evaluation reveals a condition that is better treated by other means, we will refer you to the appropriate Doctor.**

How would you like to take part in that amazing evaluation for yourself? You can... *without spending a single penny.*

Here's the answer to #2:

Since I Can't Possibly Do That Evaluation And Show You If Disc Decompression Will Work For You Without You Actually Being Here... I'm Willing To Give You All The Stuff Listed Above (\$245 value) ABSOLUTELY FREE!

Just call my office at **310-626-8037** and mention that you want your “**FREE Disc Decompression** Evaluation.” It’s absolutely free with no strings attached. There is nothing to pay for and you will NOT be pressured to become a patient. I don’t need to.

Not at all. I have a very busy practice already, mostly by word of mouth. My schedule is close to capacity already. You will be given the information you came in for, told if you qualify for my ABS program or what your best option is. From there it’s up to you.

Why would I give so much of my time away free?

The answer to that is simple:

***“I Want To Give This To As Many Back Pain Sufferers
As Possible...Before It’s Too Late.”***

The incredible feeling and freedom of knowing what is wrong and how you’re problem can be solved. The incredible feeling and freedom of FINALLY living without pain.

Bottom-Line: If you are suffering. If you don’t know what’s going on inside you. If you’re wondering if you will ever get better. If you are scared you’re gonna get worse and have to get surgery. If you have already had surgery and it didn’t work or even made you worse. After you get this free evaluation and see what **Disc Decompression** can do for you, you may not be anymore.

After you get this evaluation and qualify for **Disc Decompression** you will be like the one-eyed man in the valley of the blind! If you don’t know that story, he was king!

Now, I cannot tell you if you will qualify for my **Disc Decompression** program, but if you do you have absolutely nothing to loose and possibly everything to gain.

But you must do this right away. As I mentioned above, I have a very busy practice already. Once the word got out about my **Disc Decompression Program**, back pain sufferers started coming out of the woodwork.

Now that I’ve written this report and started running ads, I honestly don’t know how long this offer will last. I could literally get swamped with calls overnight and have to shut it down. I can only accept a very limited amount of new patients every month.

I always want to make sure you get the individual attention your case requires so you get better as fast as humanly possible. For that reason... this offer could be suspended or cancelled at any time. Most likely I will be forced to start a waiting list.

But I will guarantee you an immediate appointment if you call within the next 12 days. After that, your spot will be released to someone else.

So don’t delay. Any “thinking it over” and you could be shut out. It’s scary how fast word about my **Disc Decompression** program is traveling. If you are even the slightest bit interested in what I’ve said in this report and finding out if spinal decompression therapy can end your pain and suffering... call **310-626-8037** right now, while it is still on your mind and I still have openings.

You've spent so much time suffering already. Why not take 15 minutes of your time and find out the REAL cause and the REAL solution to your back pain ... and make your life so much easier and better?

This is how you can finally take away the pain and open so many doors in your life that were slammed shut due to this crippling condition. Finally achieve all the things you easily could have without the pain and suffering of back pain constantly holding you back.

The 7 Most Dangerous Words To Your Future

There are **7 simple words** that threaten to ruin the rest of your life. Destroy ALL your future happiness. What are they?

“ It will go away all by itself ”

If those words have crossed your mind, here are the disturbing facts:

- 1. 80-90% of all adults will suffer with low back pain at some time in there life.⁵**
- LBP is the leading cause of disability for people under 45 years of age.⁶
- 3. LBP is the second leading cause of visits to doctors' offices.⁷**
- LBP is the third leading reason for hospital admissions.⁸
- 5. Annual costs of back pain in the U.S. range from \$20-\$75 billion, and as much as \$100 billion worldwide.⁹**
- According to Met Life Insurance statistics, the average back treated medically without surgery costs \$7,210 and the average back treated surgically costs \$13,990.¹⁰
- 7. Statistics indicate that 15-20% of the population have LBP in any given year...approximately 32 million cases.¹¹**

One of the biggest "accepted" myths about back pain is that it goes away all by itself, without any treatment. Most doctors believe the claim that 90% of episodes of low back pain will resolve within one month. Well, a May 1998 study in the British Medical Journal proved this myth false. Here are the eye opening results:

Patients condition 12 months after initial medical consultation -

No pain & No Disability.....25%
Pain Or Disability.....25%
Pain AND Disability.....50%

The authors of the study concluded:

“This takes account of two consistent observations about low-back pain: firstly, a previous episode of low-back pain is the strongest risk factor for a new episode, and, secondly,

by age 30 years almost half the population will have experienced a substantive episode of low-back pain. These figures simply do not fit with claims that 90% of episodes of low back pain end in complete recovery.”¹²

My conclusion....75% of back pain sufferers will have either pain or disability or pain AND disability one year after their initial consultation to a medical doctor...It is clear that back pain does NOT get better without PROPER treatment.

30 Year Rule...

The 30 year rule is one of the most dramatic, important & life changing realities you can ever discover. Once you understand this seldom talked about harsh facts of life - the decision you have in front of you right now will become so miniscule - so trivial - so easy to make - like taking candy from a baby... or Oprah Winfrey retiring early!!!

Yet, if you don't understand this simple reality, you may wake up one day with the crushing realization that you've "let it all slip away" and it is "too late."

The 30 year rule states that most of you reading this report, according to the average onset of back pain and the average human life span, have approximately 30 years left on this planet...some more...some less.

This means, you only have approximately 30 years to do EVERYTHING you've always wanted to do...or guess what? You never will. As far as I know, you can never get any of this precious time back... not even one measly second!

Now, I don't know about you, but the first 30 years of my life went by in the blink of an eye - and it seems like the second 30 are speeding by like Speedy Gonzalez on steroids!

Now, the 30 year rule is not meant to scare you - only to give you a little "wake up call." How are you gonna spend the next 30 years? The only 30 years you have left. Agonizing in pain? Tired? Complaining? Downright Miserable? Missing all the "golden" opportunities and moments in life? Or living life to it's fullest...without any regrets or only if I "woulda" or "coulda" done that.

Real Life Security...

Most people think about one thing when they think about security...MONEY. Well, the minute you suffer with a serious health problem such as back pain, you know that not to be true. Just ask yourself this question: "If I could plunk down \$1 million in your lap right now, or take away your back pain, which would you choose?"

What would you do with your \$1 million feeling like you do?

There are many ways to make money and enjoy life if you are healthy and pain-free. I don't personally know one if you are constantly in pain.

The only ultimate security in life is your health. When you have your health, you can do anything you set your mind to... it removes so many barriers from your life... the world is your oyster.

Your Clock Is Ticking...

Each day that passes while you live in pain and do nothing about it. Each day that passes while you do not have the answers that this test and evaluation can possibly give you, is a day you might be getting worse... one day closer to disability or even surgery. That adds up. Time passing without this treatment robs you of a lot of enjoyments of life, and enjoyment delayed is too often enjoyment lost. Struggling to get out of bed. Tie your shoes. Play with your children. Make love to your spouse.

If you're struggling with back pain now, what makes you think you'll get better without something new. Something different. Something **RADICALLY** different. That something new, something radically different is what will be revealed to you when you get your evaluation and EMG. That something radically new and different is **Disc Decompression**.

So when I said your clock is ticking and I want to give this to you before it's too late, I'm talking about a powerful decision you **MUST** make **RIGHT NOW**... After all, it's your back not mine...it's your 30 years, not mine... it's your life, not mine.

*If this does not mandate you picking up the phone right now and scheduling you **FREE** test and evaluation and seeing **EXACTLY** what **Disc Decompression** can do for YOU, I'm at a loss as to what would.*

Here's Something To Consider:

When you experience **Disc Decompression**, see how quick and easy it can be to *finally* get out of pain... it's the most wonderful feeling in the world. If you continue doing what you're doing and it fails... *like most back pain treatments out there...* it can rip your heart out and destroy your life.

It is worth 15 or 20 minutes of your time to see what I have to offer? Are you kidding me? If **Disc Decompression** only works half as well as I know it does... it can mean a whole new life for you. When you finally get rid of the pain that has been holding you back, success and happiness can come flooding into your life. *Occurring literally overnight.*

Without taking this step, you may struggle forever. And *still* never discover the secret solution to your back pain. You can go to 50 other doctors and read 500 books and listen to all the "experts" in the chat rooms... *and still not even come close to the awesome potential and power I'm about to hand you.*

I can't even *begin* to understand anyone (who is serious about solving their back pain and living a happy pain-free life) would not **JUMP** on this opportunity - - *immediately*. So many people have been helped already and are pain-free today. It makes no sense for you to continue to suffer when you don't have to.

So what's it gonna be?

I've shouldered **ALL** the risk and you don't risk a single penny.

Call now **(310)-626-8037**. Don't get left out. And start a brand new life **WITHOUT** back pain *in as little as a couple treatments*.

Rolling Hills Chiropractic & Rehabilitation

P. S. One last warning: I want to give you to experience the ABS before it's too late. Before you loose your career. Before you become a surgical statistic and end up in a wheel chair. Before you live your entire life in misery. Before you are beyond help.

After you come in for your FREE evaluation and experience **Disc Decompression** you will have the ONE THING so many others around you suffering with back pain do not have. This is your opportunity to posses a power so many suffering with back pain do not have. Sort of like being the only person with an "S" on your chest that can run faster than a locomotive and leap tall building in a single bound.

Because I know how back pain consumes and ruins your life. I am absolutely convinced that it is more important for you to focus your attention on this ONE THING, the possible solution to your back pain, than anything else, regardless of how important you THINK other things are.
